SUMMARY

I lead Dell's Social and Banner creative operation at VML: localizing campaigns for Brazil from briefing to final QA, working directly with Dell's team in Miami. What sets me apart is that I don't just manage the workflow — I build its tools. I started in design in 2016 and learned to code to fix the bottlenecks I was living with. During the 2025 Black Friday quarter, I coordinated 168 jobs and 830 assets with 89% of deliveries on schedule. 2,300+ jobs and 8,500+ assets delivered by the operation since 2023.
